

示例Exam 10：分析一下代码的运行结果

编写shell脚本如下:

```
#!/bin/bash

list="rootfs usr data data2"

for i in $list;
do
    echo $i is appoint ;
done ;

#end
```

运行脚本结果如下:

```
[zhx@localhost test02]$ sudo bash test
rootfs is appoint
usr is appoint
data is appoint
data2 is appoint
```
